

EVIDANTE

R&D EVIDENCE PLATFORM

The demo guide

How to run a calm, accurate, six-minute Evidante demo, from the day before to the follow-up email.

Account: demo@evidante.com (Evidante Demo)

Site: www.evidante.com

Version: 6 October 2026

Screens: captured from the live site on 6 October 2026

Internal. Do not share with prospects.

The demo at a glance

One message, said three times: **your clients do the R&D, Evidante preserves the evidence, and you decide what it means.** Everything you show proves one of those three things. Nothing you say should suggest that Evidante judges the work.

Who it is for: a partner or R&D lead at a tax practice. Length: about six minutes of showing, then questions. You never type a password in front of them and you never show test data.

Time	Step	What they should take away
0:00	1. The home page	Who Evidante is for, in one sentence
0:30	2. Clients (portal home)	Only real problems reach you; everything else is plain counts
1:15	3. The client	Organised by project; no scores or grades
1:45	4. The evidence	Dated records of what actually happened, as it happened
3:00	5. The review	The professional decides, in their own words
4:00	6. The Defence Pack	Everything in one document, with plain limits on page one
5:00	7. Integrity check	Anyone can prove nothing has changed, without an account
5:45	8. Close	One question: shall we set up your first client?

BEFORE YOUR FIRST DEMO

Helix Systems (demo) was added on 6 October 2026: that is the client you demo. The account still holds two test clients, **Northwind Analytics Ltd** (internal test data) and **abc**. **Never demo on Northwind**. Before your first demo, do steps 2.2 and 2.3 (delete abc, hide Northwind) in the browser you will demo from. It takes two minutes.

About the screenshots: every screen in this guide was captured from the live site on 6 October 2026, signed in as the demo account, with Helix Systems (demo) and the test clients hidden, exactly as you will see it.

Set up once, at least a day before

2.1 Add the demo client "Helix Systems (demo)" (done on 6 October 2026)

You have already done this step. Keep it for when Helix needs re-creating (see the tip below) or for a US demo.

Helix is a fictional software company with two projects, "Query engine performance" and "Billing export rewrite", and a realistic story: a slow query, a first approach that failed, a broken build, and the fix two weeks later. It also comes with a sample professional review and one Defence Pack. It only ever writes to the new client it creates; it cannot touch any other client.

On your Mac, open **Terminal**, paste these lines and press Enter. It asks for your admin key and does not show it as you type (this is the ADMIN_SECRET value in Railway, Variables).

```
printf "Admin key: "; read -rs EV_ADMIN; echo
curl -s -o /dev/null -w "%{http_code}\n" -X POST \
  "https://discerning-emotion-production-57fd.up.railway.app/admin/demo-seed/demo@evidante.com" \
  -H "x-api-key: $EV_ADMIN"
unset EV_ADMIN
```

Terminal prints	Meaning	What to do
200	Helix was created	Carry on with 2.2
409	Helix already exists	Nothing; carry on
401	Wrong admin key	Copy the key again from Railway and re-run
404	Demo account not found	Check the account email is demo@evidante.com

For a **US prospect**, run the same lines with ?jurisdiction=us added to the end of the address (before the closing quote). That creates "Helix Systems Inc. (demo)" with Form 6765 figures. Then use the **US** switch in the portal header during that demo.

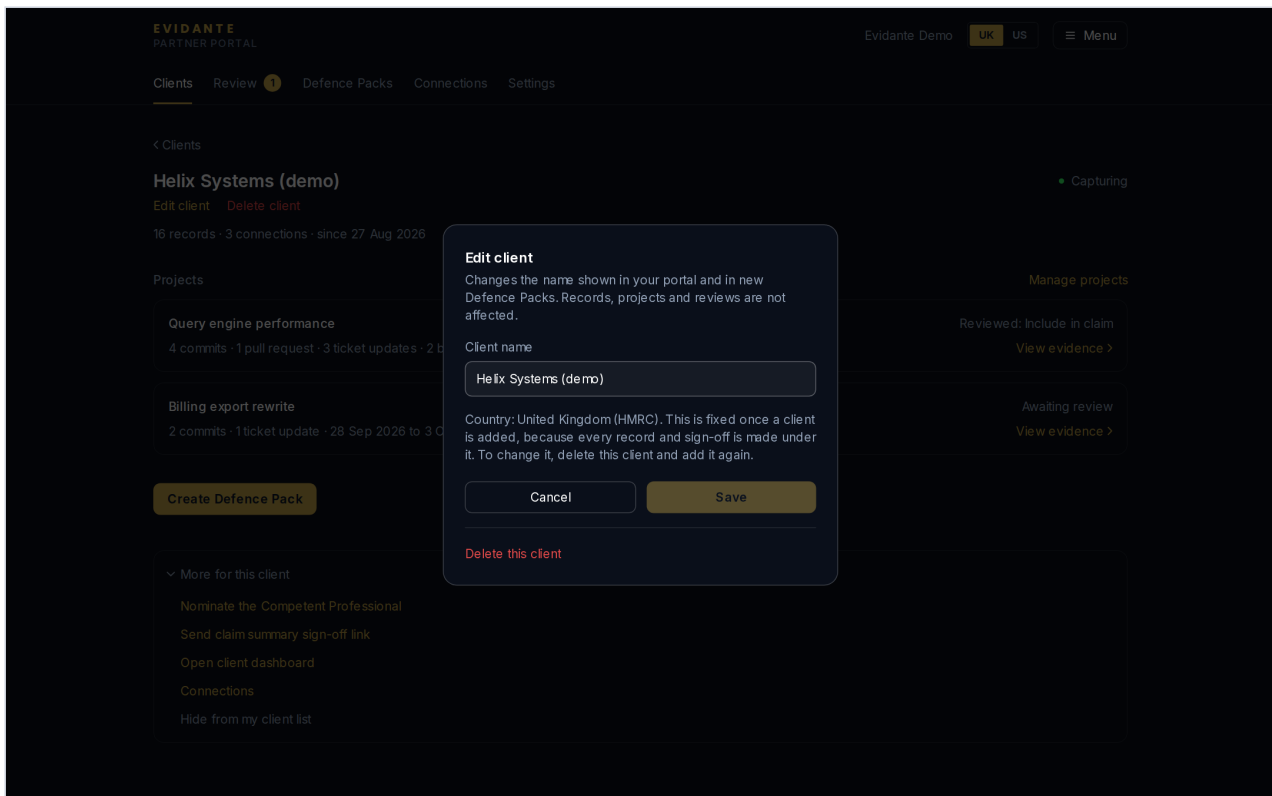

TIP

Helix's records are dated over the six weeks before the day you run the command, and its newest records are 3 to 5 days old. After about a week, the portal starts warning that Helix's tools have gone quiet. So **if Helix was created more than 7 days ago, re-create it**: open it, Delete client, type its name, then run the command again.

2.2 Delete the test client "abc"

You added "abc" as a test. It has no records and shows as "Not active", which raises an attention warning on the home screen.

1. Sign in at **www.evidante.com/partner/login** with demo@evidante.com.
2. Click **abc** in the client list.
3. Click **Delete client** (red, under the name).
4. Type **abc** to confirm, then click **Delete permanently**.

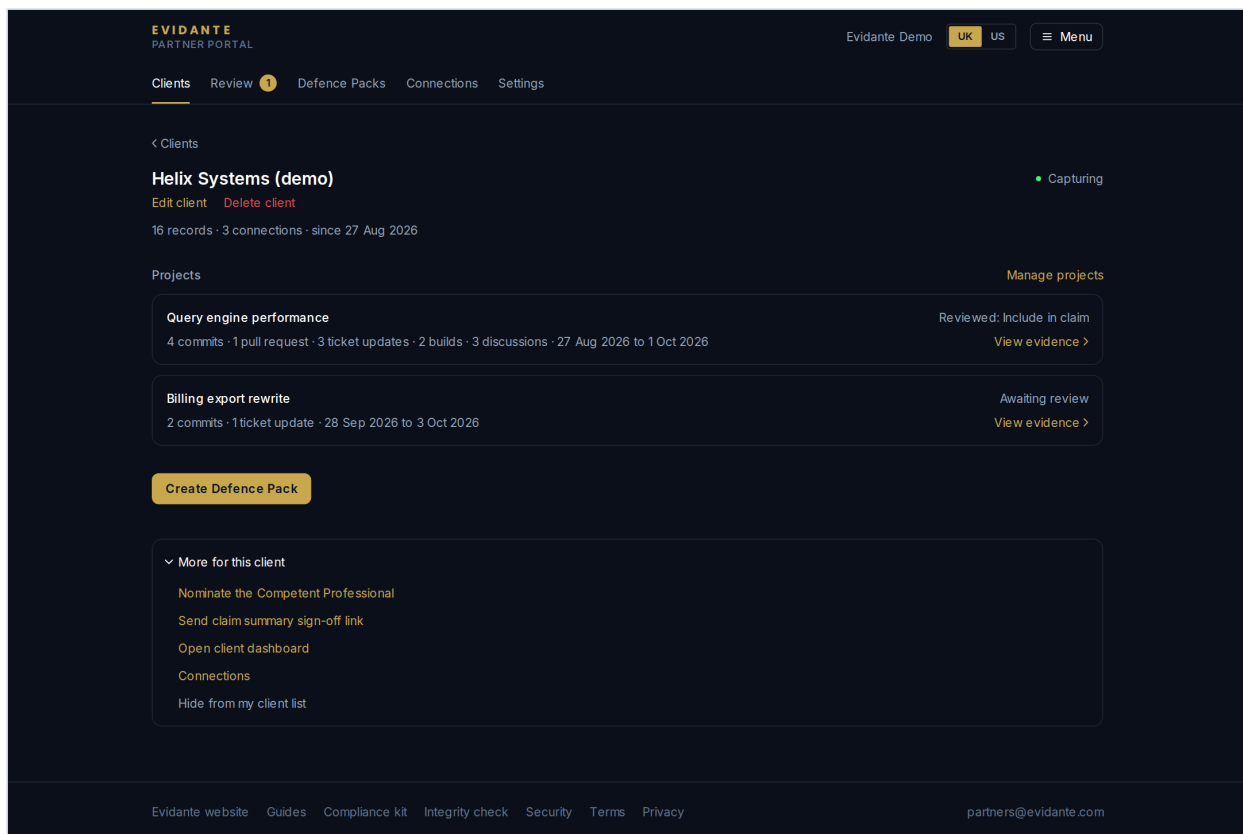

Edit client (shown here for Helix) lets you rename a client and has a delete link at the bottom. Delete client sits next to it, under every client's name.

WATCH OUT

Never delete **Northwind Analytics Ltd**. It is the client behind the public demo reference EV-8BDD-6C61-D771 used on the Integrity check page. Hide it instead (2.3).

2.3 Hide Northwind from your client list

1. Open **Northwind Analytics Ltd**.
2. Click **More for this client** at the bottom.
3. Click **Hide from my client list**.

"More for this client" opened (shown for Helix; Northwind's is the same). "Hide from my client list" is the last item. Hiding is remembered by this browser only, so always demo from the same browser (not a private window).

After this, the home screen shows only Helix, the Review badge counts only Helix, and the attention box says "Nothing requires your attention" (Northwind's "No GitHub activity since 2 May" warning disappears).

2.4 Keep a backup copy of the Helix Defence Pack

1. Click **Defence Packs** in the top bar. Helix's pack was created by step 2.1.
2. Click **Download** next to the newest pack. Keep the PDF open in a separate window during every demo.
3. On page 1 of that PDF, note the line **Client reference**. For the current Helix it is **EV-6F4F-9945-E357** (it changes if you re-create Helix). Write it on a sticky note: you use it in step 7 if Check integrity does not open.

2.5 Rehearse three times

Run the whole of "The demo, step by step" out loud with a timer, three times, before your first real demo. Record yourself once and count the words from the "Words to avoid" list near the end. Aim for under six minutes and zero banned words.

Thirty minutes before

	Check	How
☐	Same browser as setup	Use the normal (not private) window where you hid Northwind. Close every other tab.
☐	Notifications off	Mac: Focus mode on. Close Slack, email and messages.
☐	Zoom 110%	Cmd and + once in the browser, so text reads well on a shared screen.
☐	Signed in already	Open www.evidante.com/partner/login and sign in now, so you never type a password on screen.
☐	UK or US switch	Top right of the portal. UK for UK prospects, US for US prospects. The wrong one hides your demo client.
☐	Clients screen is clean	Only Helix is listed. The attention box says "Nothing requires your attention".
☐	Helix evidence opens	Open Helix, View evidence on "Query engine performance", click one day, click one record: the side panel opens.
☐	Review queue	Review shows "Billing export rewrite" waiting.
☐	Pack downloads	Defence Packs, Download on the Helix pack. Keep that PDF open in another window.
☐	Integrity check	Check integrity on the Helix pack opens a new tab with the result. Allow pop-ups for evidante.com if blocked.
☐	Tabs ready	Tab 1: www.evidante.com (home). Tab 2: the portal on the Clients screen.

TIP

If any check fails, refresh once. If it still fails, run the demo from the downloaded Defence Pack PDF and the public Integrity check page; both work without signing in. See "If something goes wrong" at the end.

The demo, step by step

Each step tells you what to click, what to say (read it until it is yours, then say it in your own words) and what to avoid. Pause after each step and ask if they have a question. Silence is fine.

STEP · 0:00 to 0:30

1. Start on the home page

Do: share your screen with Tab 1, www.evidante.com. Check the switch at the top right shows **UK** (or **US** for a US prospect).

EVIDANTE
R&D EVIDENCE PLATFORM

How it works · Product tour · Guides · Integrity check · Security

17 Apr 2026 15:18	Asana	Task updated: load test results

Integrity check: no records changed

The home page. The UK / US switch (top right) changes every page to that country's rules and wording. On a phone, the menu button opens every page.

SAY

"Your clients do the R&D. Evidante preserves the evidence. It records engineering activity from the tools the team already uses, as it happens, dated and kept unchanged. Your Competent Professional decides what qualifies. Let me show you what that looks like for a firm."

Then: switch to Tab 2 (the portal, already signed in). Do not click Partner portal and sign in on screen.

STEP · 0:30 to 1:15

2. Clients: the portal home

EVIDANTE
PARTNER PORTAL

Evidante Demo **UK** **US** **Menu**

Clients Review **1** Defence Packs Connections Settings

Clients **Add client**

All clients 1 client · 16 records Search

Client	Records	Connected tools	Status
Helix Systems (demo)	16 records	GitHub, Jira, Slack	• Capturing · 3 Oct 2026

Show 2 hidden clients

Evidante website Guides Compliance kit Integrity check Security Terms Privacy partners@evidante.com

The Clients screen with only Helix listed. Top: anything that needs you (here, nothing). Middle: plain counts. Bottom: every client. "Show 2 hidden clients" is the test clients you hid; never click it in a demo.

SAY

"This is what you see every morning. At the top, anything that needs you, for example a client whose tools stopped sending activity, with the date it stopped. Nothing else ever goes there. Below that, plain counts: clients capturing, records kept, packs created."

If the attention box says "Nothing requires your attention", add: "That's the normal state."

WATCH OUT

If you see Northwind or abc here, you are in a different browser or skipped 2.2 and 2.3. Do not open them. Say nothing about them and click Helix.

STEP · 1:15 to 1:45

3. Open the client

Do: click **Helix Systems (demo)**.

The screenshot shows the Evidante Partner Portal interface. At the top, there's a header with the Evidante logo, 'PARTNER PORTAL', and navigation links: 'Clients', 'Review' (with a notification badge), 'Defence Packs', 'Connections', and 'Settings'. On the right, there's a language selector (UK, US) and a 'Menu' button. Below the header, the main content area is titled '< Clients' and shows 'Helix Systems (demo)' with a status indicator 'Capturing'. Underneath, there are links for 'Edit client' and 'Delete client', and a summary: '16 records · 3 connections · since 27 Aug 2026'. A 'Projects' section follows, with a 'Manage projects' link. It lists two projects: 'Query engine performance' (Reviewed: Include in claim, View evidence >) and 'Billing export rewrite' (Awaiting review, View evidence >). Below the projects is a 'Create Defence Pack' button and a link '> More for this client'. The footer contains links to 'Evidante website', 'Guides', 'Compliance kit', 'Integrity check', 'Security', 'Terms', 'Privacy', and the email 'partners@evidante.com'.

Helix: 16 records from GitHub, Jira and Slack. "Query engine performance" shows "Reviewed: Include in claim" (the sample review); "Billing export rewrite" is awaiting review.

SAY

"Each client is organised by project. No scores, no grades: just what was recorded. 'Query engine performance' has commits, ticket updates, discussions and builds. This one has already been reviewed by a professional; 'Billing export rewrite' is waiting."

Point at, but do not click: Edit client and Delete client under the name ("you can rename or remove any client"), and Create Defence Pack.

STEP · 1:45 to 3:00

4. The evidence: what actually happened

Do: on "Query engine performance", click **View evidence**. The chronology opens, one row per day.

Professional review

Your assessment of this project is recorded here and included in the Defence Pack. Eligibility and qualifying expenditure are determined by the appointed professional; Evidante provides evidence capture and integrity tooling only.

Current: Include in claim

Sample reviewer (demo) · 6 Oct 2026

A day opened: every record from that day, in full (here the first day: the Jira ticket and the Slack note).

SAY

"This is the moment their first approach failed. Here's the commit reverting it, the Slack note on what they tried next, then the failed build, and the fix two weeks later. Nobody wrote this up afterwards; it was recorded as it happened."

Do: click one record, for example the Slack note. A panel opens on the right.

The screenshot shows the Evidante Partner Portal interface. The main content area displays a list of records under the heading 'Query engine performance' for the period 'Activity from 27 Aug 2026 to 1 Oct 2026'. The records are as follows:

Date	Record Details
27 Aug 2026	ENG-184 created: query p99 latency is 480 ms on 50M-row tables; target is 200 ms 1 ticket update · 1 discussion Jira ticket update · ENG-184 created: query p99 latency is 480 ms on 50M-row tables; target is 200 ms Slack /friction note · A standard B-tree index does not help; the planner still chooses a sequential scan on the 50
3 Sep 2026	Prototype index partitioned by tenant 2 commits
10 Sep 2026	Revert partitioned index approach: writes became 4x slower 1 commit · 1 ticket update · 1 discussion
17 Sep 2026	Experiment: bloom filter check before index lookup 1 pull request · 1 build
24 Sep 2026	Tune bloom filter size: p99 down to 140 ms on the 50M-row fixture 1 commit · 1 build
1 Oct 2026	ENG-184 moved to Done 1 ticket update · 1 discussion

Below the list is a 'Professional review' section with the text: 'Your assessment of this project is recorded here and included in the Defence Pack. Eligibility and qualifying expenditure are determined by the professional; Evidante provides evidence capture and integrity tooling only.'

On the right, a panel titled 'Jira ticket update' is open, showing details for the selected record:

- When:** 27 Aug 2026, 09:00 UTC
- Who:** Ana Ruiz
- Where:** ENG-184
- What it says:** ENG-184 created: query p99 latency is 480 ms on 50M-row tables; target is 200 ms
- Recorded by Evidante:** 6 Oct 2026, 22:21 UTC
- Added later (retrospective):** Original record preserved.
- Technical details:** (expandable section)

One record: when it happened, who (Ana Ruiz), where (ENG-184), what it says, when Evidante recorded it, and "Added later (retrospective)". The proof is under Technical details.

SAY

"Who, where, what it says, and when Evidante recorded it. The technical proof is one click down, under Technical details, for anyone who wants it."

BE STRAIGHT ABOUT THIS

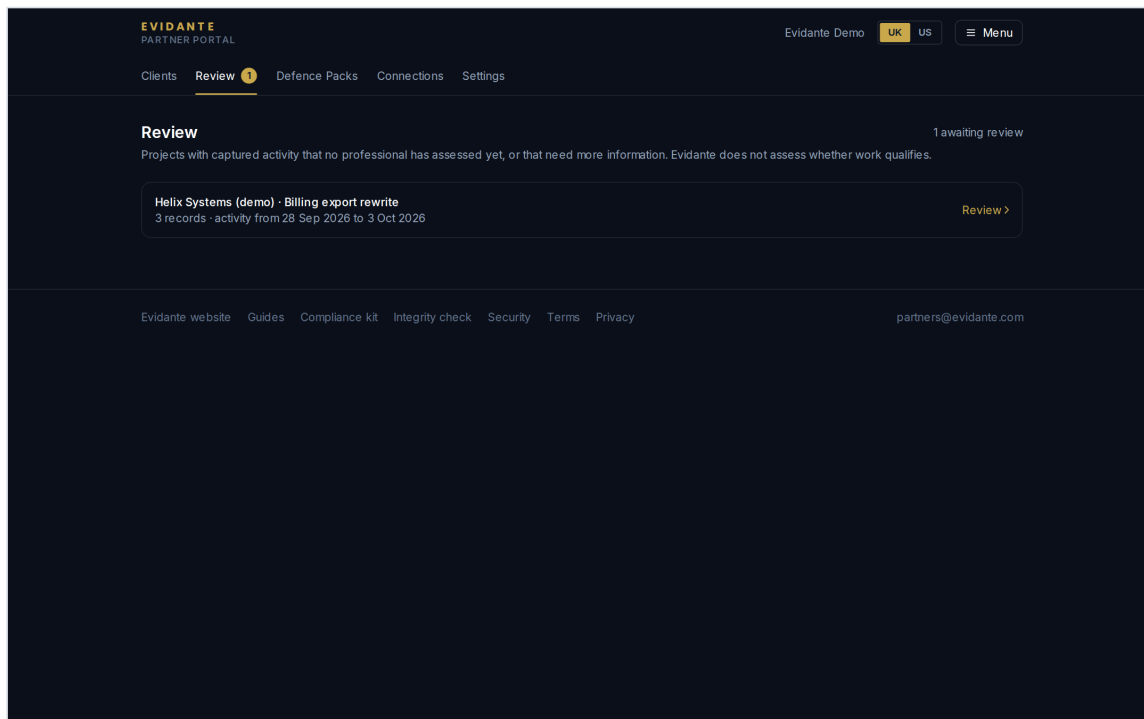

Helix's records say **"Added later"**, because they were loaded when you ran the setup command, not captured live. Say it before they notice: "These say 'Added later' because I loaded this demo client recently. A real client's records say 'Captured as it happened'." Being straight about this builds trust.

Do: close the panel (the X, or press Escape).

STEP • 3:00 to 4:00

5. The review: the professional decides

Do: click **Review** in the top bar.

The Review queue: Helix's "Billing export rewrite" is waiting.

SAY

"Your queue: projects with activity that no professional has assessed yet."

Do: click **Review** next to "Billing export rewrite". The project's evidence opens with the page already moved down to the **Professional review** form.

Professional review
Your assessment of this project is recorded here and included in the Defence Pack. Eligibility and qualifying expenditure are determined by the appointed professional; Evidante provides evidence capture and integrity tooling only.

Current: Include in claim Sample reviewer (demo) · 6 Oct 2026
 Sample review for the demo. The professional records their own decision and reasons here.
 Scientific or technological uncertainty: Sample reason (demo): whether the index rewrite could meet the latency target was not known at the start.
 Cost categories: Staff costs, Data and cloud computing

☒ Include in claim
☐ Exclude from claim
☐ Needs more information

Notes

Reasons by criterion and cost categories (optional)
 Advance sought
 Scientific or technological uncertainty
 Project boundaries (start and end)
 Direct and qualifying indirect activities

Cost categories this project's costs fall under

☒ Staff costs	☐ Externally provided workers
☒ Subcontractors	☐ Consumables
☒ Software	☐ Data and cloud computing

Your name

Record assessment

The professional's form, with "Reasons by criterion and cost categories" opened (captured on "Query engine performance", which shows its sample review at the top). On "Billing export rewrite" there is no current review yet.

Do: choose **Needs more information**. In Notes type: "Need the memory profile before and after the chunked export." Click **Reasons by criterion and cost categories** to show the fields, but leave them empty. Type your own name in **Your name**. Click **Record assessment**.

SAY

"That's your judgment, in your words, against the criteria you work to, kept on the record with the date. Evidante does not assess whether work qualifies. You do."

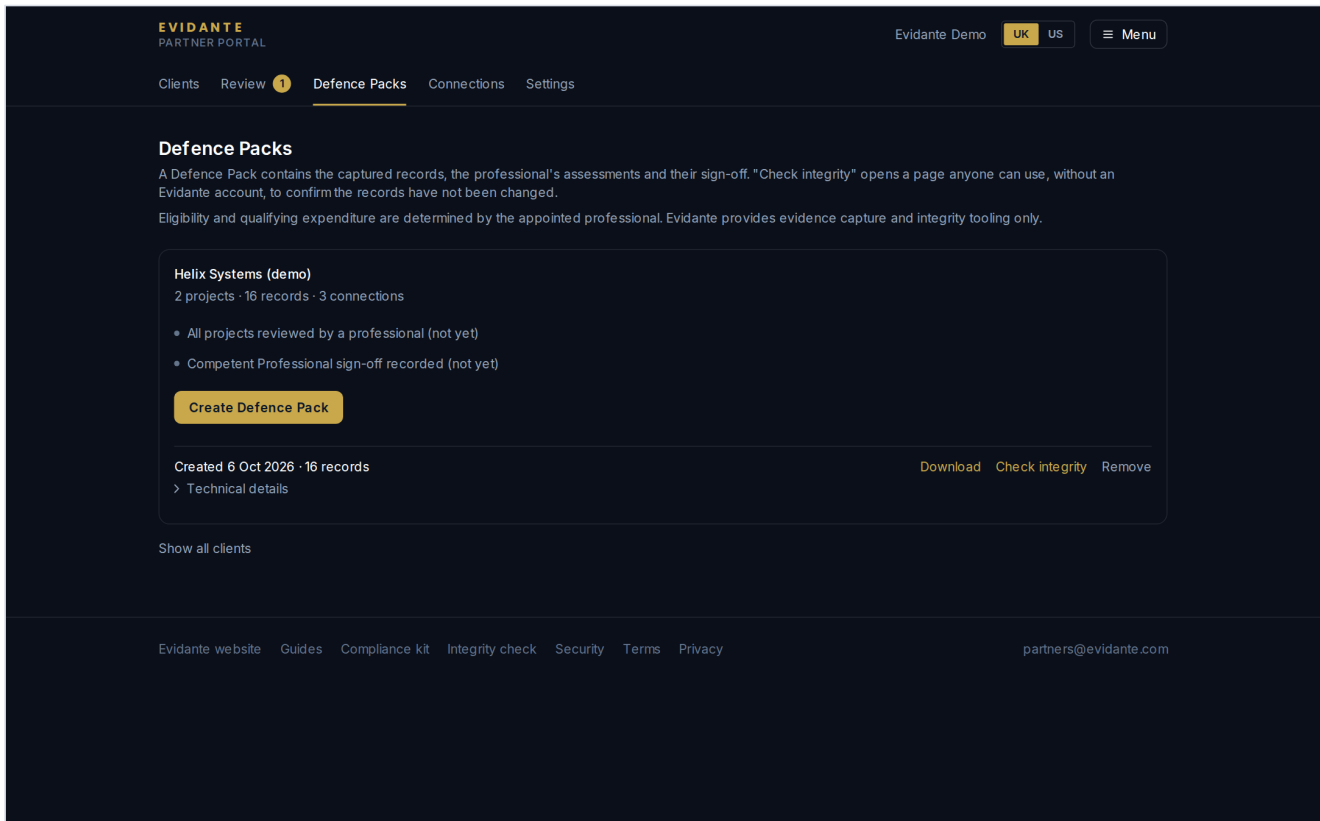

WATCH OUT

Always choose **Needs more information** in a demo. Assessments are permanent records. "Needs more information" keeps the project in the queue, so the next demo works the same way. Choosing Include or Exclude removes it from the queue for good.

STEP · 4:00 to 5:00

6. The Defence Pack

Do: click **Defence Packs** in the top bar.

Helix's Defence Packs: 2 projects, 16 records, 3 connections; whether every project has been reviewed and signed off (not yet); then each pack with Download, Check integrity and Remove.

SAY

"For each client: every record, the professional's decisions, and how each record was captured."

Do: click **Download** on the newest Helix pack and open it. (Or switch to the copy you downloaded beforehand: it is faster.)

EVIDANTE

Defence Pack: R&D Evidence Records
Dated records of engineering activity, for the firm and its Competent Professional
Generated: 2026-10-06 22:40:06 UTC
Client reference: EV-6F4F-9945-E357
Jurisdiction: UK

RETROSPECTIVE EVIDENCE DISCLOSURE

RETROSPECTIVE EVIDENCE DISCLOSURE (CIRD80550/80560): This bundle contains retrospectively-recorded evidence. Self-authored descriptions (e.g. team-chat notes) represent the competent professional's account of the work, not a primary contemporaneous record; source-system events (commits, CI, tickets) carry their original event timestamp; any evidence extracted from ingested documents is listed individually, with per-document hashes and CP attestation status, in the retrospective evidence section. The SHA-256 chain shows each item has not changed since it was added; the time it was added is recorded by Evidante's server. Evidence type: RETROSPECTIVE

ABOUT THIS PACK: This pack supports an R&D claim. It does not determine eligibility or qualifying expenditure. Evidante captured these records and keeps them dated and unchanged. It does not decide whether any work qualifies for R&D relief and does not give tax advice; the professional's decisions are in the Professional Review section. This pack is not the Additional Information Form, which the firm submits to HMRC before the CT600 that claims the relief.

PACK SUMMARY

Records in this pack	16
Projects reviewed by the professional	1 of 2
Blocks in This Bundle	19
Final Block Hash	7a542988672d66ad3625d7417c5b12181c89fb4adc6a98ff3a09ff77053bb3fc
Chain Integrity	INTACT - All hashes cryptographically verified

NOT RECORDED YET

- No baseline declaration has been recorded yet. The professional records it from the link on the client's dashboard; it states what was already known when each project began.

UNCERTAINTY LOG · CIRD81930 Competent Professional Attestation

No uncertainty log entries have been confirmed by the professional yet.

Professional review

Assessments recorded by the reviewing professional. Evidante does not assess whether work qualifies.

Page 1 of Helix's Defence Pack. Client reference near the top; "About this pack" states the limits; "Projects reviewed by the professional: 1 of 2"; "Not recorded yet" lists what is missing.

Project	Assessment	Notes	Reviewer	Date
Query engine performance	Include in claim	Sample review for the demo. The professional records their own decision and reasons here. Scientific or technological uncertainty: Sample reason (demo): whether the index rewrite could meet the latency target was not known at the start. Cost categories: Staff costs, Data and cloud computing	Sample reviewer (demo)	2026-10-06

RECORDS BY PROJECT

Every captured record, in date order, under the project the firm assigned it to. Evidante does not assess whether work qualifies; the professional's decisions are in the Professional Review section.

Query engine performance (13 records)

Date	Source	Record	How captured
2026-08-27	Jira	ENG-184 created: query p99 latency is 480 ms on 50M-row tables; target is 200 ms	Added later
2026-08-27	Slack	A standard B-tree index does not help: the planner still chooses a sequential scan on the 50M-row table	Added later
2026-09-03	GitHub	Prototype index partitioned by tenant	Added later
2026-09-03	GitHub	Add benchmark harness for joins on the 50M-row fixture	Added later
2026-09-10	GitHub	Revert partitioned index approach: writes became 4x slower	Added later
2026-09-10	Jira	ENG-184 moved from In Review back to In Progress	Added later
2026-09-10	Slack	Partitioning fixed reads but made writes 4x slower. Trying a bloom filter check before the index lookup instead	Added later
2026-09-17	GitHub	Experiment: bloom filter check before index lookup	Added later
2026-09-17	GitHub	Build failed [failure]: integration-tests	Added later
2026-09-24	GitHub	Tune bloom filter size: p99 down to 140 ms on the 50M-row fixture	Added later
2026-09-24	GitHub	Build passed: integration-tests	Added later
2026-10-01	Jira	ENG-184 moved to Done	Added later
2026-10-01	Slack	Writing up why partitioning failed and why the bloom filter worked, for the design doc	Added later

Billing export rewrite (3 records)

Date	Source	Record	How captured
2026-09-28	GitHub	Move billing export to a streaming CSV writer	Added later
2026-09-30	Jira	BIL-42 moved to In Progress: billing export runs out of memory above 2M rows	Added later
2026-10-03	GitHub	Export in 50k-row chunks; memory flat at 300 MB	Added later

EVIDENCE GAPS

What the record does not yet hold, per project. These are counts and absences, not a view on whether the work qualifies.

Query engine performance: 13 of 13 records added later, not captured as the work happened

Billing export rewrite: 3 of 3 records added later, not captured as the work happened; No professional review recorded

Page 2: the professional's review with reasons, every record by project marked "Added later", and Evidence gaps.

SAY

Point at the first sentence of **About this pack**: "This pack supports an R&D claim. It does not determine eligibility or qualifying expenditure." Then scroll to **Professional review** and **Evidence gaps**: "Facts only: what the record does not yet hold, so you know what to ask the client for."

The orange boxes on page 1 appear because Helix's records were added later and no baseline has been recorded. If asked, say: "The pack says plainly what's missing and how each record arrived. For a client connected from the start, with a baseline recorded, those boxes aren't there."

WATCH OUT

Do not click **Create Defence Pack** or **Remove** during a demo. Creating works, but adds another pack to the list each time.

STEP · 5:00 to 5:45

7. Anyone can check it has not changed

Do: back in the portal, click **Check integrity** next to the same pack. A new tab opens and re-checks every record in the browser, then shows the result at the top and the client details below. Try it during your 30-minute check so you know exactly what it looks like.

VERIFICATION STATEMENT

This certificate confirms that the records for client reference EV-8800-6C61-0771 (36 captured records, dated 2026-03-11 to 2026-10-03) have not been changed since they were captured. It does not assess whether any work qualifies for R&D relief. This verification was performed at 2026-10-06T22:40:14 UTC by Evidante Ltd.

This check confirms the records have not changed since they were captured. Anyone holding the original records can recompute the hash values above. Evidante is not an HMRC or IRS service.

Evidante Ltd - Integrity Check - This certificate does not constitute legal or tax advice.

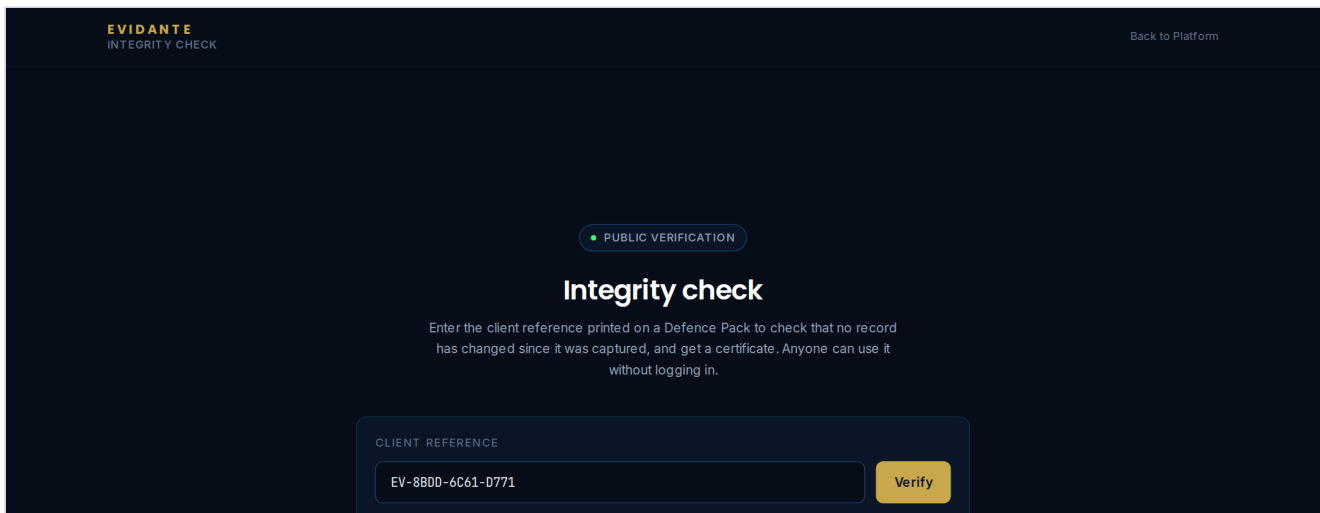

Evidante checks that records have not changed. It does not judge the R&D claim. Not an HMRC or IRS service.

The result layout at www.evidante.com/verify: "Chain intact", the number of records and the dates. (Captured with the public demo reference; for Helix you will see Helix's 16 records and no sign-off.) The page that opens from Check integrity shows the same facts in a different layout. No account is needed for either.

SAY

"Anyone can check the pack has not been changed: HMRC, your reviewer, the client. No Evidante account needed. Every record's fingerprint was recalculated and matches."

If the new tab does not open (a pop-up blocker): go to **www.evidante.com/verify**, type the client reference from your sticky note (from page 1 of the pack) and click **Verify**.

The public Integrity check page. Type Helix's reference (EV-6F4F-9945-E357). Do not click "Use the demo reference": it fills in the test client's reference.

STEP · 5:45 to 6:00

8. Close

SAY

"Your clients do the R&D. Evidante preserves the evidence. You decide what it means. Shall we set up your first client?"

Then stop talking. If they say yes, click **Clients**, then **Add client**, and do it with them (see "After the demo" at the end).

Optional extras, only if asked

"What does my client see?" Open a new tab at www.evidante.com/login?demo=1 and click **Enter demo**. This is a separate sample client's own dashboard.

The screenshot shows the Evidante client dashboard. At the top, it says "Capturing. Professional sign-off recorded." and "UK - United Kingdom". Below this, there's a section "RECORDS PRESERVED" with a large number "31". A status bar indicates "Capturing: records received in the last 14 days". There's a section for "R&D CLAIM SCHEME" with a note about Finance Act 2023 and buttons for "Merged RDEC (15-16.2%)" and "ERIS (~27%)". A checkbox for "First-time claimant (or no claim in last 3 years)" is present. Below this is a "SETUP" section with a "Complete" status. A "NOT RECORDED YET" section shows two warnings: "No records from a ticket tracker (Jira or Linear) yet." and "New records have arrived since the professional signed off." with a "Download record log (ZIP)" button. At the bottom, there's a navigation bar with tabs: "Overview", "Financial", "Technical", and "Compliance".

A client's own dashboard: records preserved, capture status, and what is not recorded yet, in plain words.

"Can I look at it myself later?" Send them www.evidante.com/demo, a short self-running tour that needs no account. It follows the UK / US switch.

The screenshot shows the Evidante product tour. It starts with a navigation bar with tabs: "01 The Problem", "02 Evidence Capture", "03 Integrity", "04 Baseline", "05 Professional Review", "06 Defence Pack", and "07 Firm-Level Subscription". The main content area is titled "01 / 07 - THE PROBLEM" and features large statistics: "£4.1 billion lost to R&D claim error and fraud, 2020-21 to 2023-24." and "£7.6bn Total R&D relief claimed (2023-24, provisional)". Below these, it says "£4.1bn Lost to error and fraud (2020-21 to 2023-24)" and "26% Fall in the number of claims (2023-24)". A "Next" button is visible at the bottom.

The self-running product tour at www.evidante.com/demo.

Questions you will get

Question	Answer
Will this help with HMRC?	"When HMRC asks what happened and when, there's a dated record made at the time, and you can show it hasn't been changed. Whether the work qualifies, and what to claim, is still your judgment. We don't make that call."
Does it decide what qualifies?	"No. Your Competent Professional decides. Evidante keeps every record and shows you what's there."
Is there AI in it?	"No AI judges the work, writes the records or suggests what qualifies. Records are kept exactly as they were captured."
Do you read our source code?	"No. We record activity: commit messages, ticket updates, build results and messages people send to Evidante. We never access source code."
Where is the data?	"In AWS in London and a managed database, both encrypted at rest. Firm passwords are stored only as secure hashes. Card payments go through Stripe." (Details: www.evidante.com/security .)
What about work done before we connect?	"You can import earlier history. It is labelled 'Added later' everywhere, including in the pack, so it is never mistaken for a record made at the time."
How long does setup take?	"You add the client in a minute. They connect GitHub, Jira or Slack from their own setup page; most teams do it in under fifteen minutes. Records start arriving straight away."
Do you support US claims?	"Yes. Switch to US and everything follows the IRS rules: Section 41, Form 6765 and Section G. The professional still decides what qualifies."
Can we delete a client's data?	"Yes. Delete client removes everything we hold for that client. You type the client's name to confirm."
Is it HMRC-approved?	"No. HMRC doesn't approve evidence software, and anyone who says otherwise is wrong."
What does it cost?	One flat subscription per firm, with a 14-day free trial. Give the figure you have agreed; there is no public pricing page yet.

Words to avoid

Say none of these, about records or about the product:

Avoid	Say instead
eligible, qualifying (about records), score, grade, strength, at risk, flagged, verdict	"recorded", "what the record shows", "the professional decides"
HMRC-ready, audit-ready, compliant, guarantee, defensible (as a promise)	"supports a claim", "dated and unchanged", "anyone can check it"
AI decides, AI suggests	"No AI judges the work"
"we'll win your enquiry"	"you'll have the records made at the time"

If something goes wrong

What happens	What to do
A red error message	Refresh once. If it persists, say "Let me show you the finished pack" and use the PDF you downloaded beforehand.
Signed out / sign-in fails	Do not type the password on a shared screen. Stop sharing, sign in, share again. Or carry on with the PDF and www.evidante.com/verify (no sign-in needed).
Helix is missing from Clients	Check the UK / US switch (top right). The wrong country hides the client. If it is still missing, Helix was not created: use the PDF.
Northwind or abc appears	You are in a different browser. Ignore it and click Helix. Afterwards, redo 2.2 and 2.3 in this browser.
Check integrity does nothing	A pop-up blocker. Go to www.evidante.com/verify and type the reference from your sticky note.
Pages are slow	Keep talking about the step you are on; the first load after a quiet period can take a few seconds.
You need another page	Use Menu (top right of the portal): product tour, guides, compliance kit, integrity check, settings, sign out. Every portal page also has these links at the bottom.
You get a question you can't answer	"Good question. I'll confirm that in writing today." Write it down and do.

Never click during a demo

- **Delete client** or **Delete permanently**
- **Set up billing**
- **Create Defence Pack** or **Remove** on a pack
- **Include in claim** or **Exclude from claim** (use Needs more information)
- Anything on the Northwind client

After the demo

- 1. Same day:** send a short thank-you email with www.evidante.com/demo (the self-running tour) and www.evidante.com/legal/scope-of-platform (what Evidante does and does not do). Do not attach the Helix pack: it is sample data.
- 2. If they said yes:** in the portal click **Add client**, enter the client's company name and country, and the client's email if you want Evidante to send them their sign-in details. Open the new client and click **Activate client** (this needs your firm's billing set up in Settings; there is a 14-day free trial). The client then signs in and connects GitHub, Jira or Slack from their Setup page.
- 3. Answer every open question in writing** within 24 hours.
- 4. Reset for the next demo:** nothing to do. The review you recorded keeps "Billing export rewrite" in the queue. If Helix was created more than 7 days before your next demo, delete it and run step 2.1 again.

REMEMBER

The best demos are short and calm. Show six screens, say the one message three times, ask one question at the end, and stop.
